# MECHANICS OF CONTINUOUS MEDIA

## Contents

Contents p.i

**1. Kinetics of Continuous Media.** p.1

1.1 General definitions—description of the motion. p.1

1.2 The strain tensor. p.13

1.3 Transformation of regions in a continuous medium. p.40

**2. Dynamics of Continuous Media.** p.52

2.1 General definitions—Analysis of a stressed state. p.52

**3. Stress—Strain relations—Elastic media.** p.101

3.1 Laws of Thermodynamics, their use in the construction of mathematical models for continuous media. p.101

3.2 Elastic media. p.106

3.3 Linear isotropic elastic medium. p.115
